

RUBBER SPEED MODERATOR

- **Slows vehicles safely**
- **Oil, sun, salt and chemical resistant**
- **Quick installation**
- **Interlocking pieces allow for many configurations**

Samar's synthetic rubber speed moderator offers the most cutting edge features and benefits in the industry without sacrificing any of the effectiveness of traditional tar speed bumps. The synthetic rubber maximizes durability and flexibility while offering oil, sun, salt, and chemical resistance. The speed moderator is also composed of unique interlocking pieces that allow for easy transportation, quick installation, and an array of designs and sizes. Perfect for parks, residential communities, driveways, and parking lots (especially schools, hospitals, and businesses), it will slow, but not damage vehicles.

- Perfect for parks, residential communities, driveways, and parking lots (especially schools, hospitals, and businesses)
- Easy installation and transportation
- Wheelchairs, motorcycles, bicycles, cars, and trucks, and emergency vehicles
- Oil, sun, salt, and chemical resistant.
- High Visibility
- Interlocking synthetic rubber components allow for numerous sizes/lengths
- Edge pieces eliminate damage to vehicles.

A HOSE FOR EVERY NEED.
